

LESSON PLAN

Department: Orthopaedics

Period: 3th July 17 to 4th Sep 17

Semester: 7th Semester

Sr. no.	Date	Topic	Learning Objectives	Name of Teacher
1	03/07/2017	Fracture olecranon a) Classification b) Signs and symptoms c) Treatment d) Operative Treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Ishan Shevate
2	05/07/2017	Ankle fractures a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Swaroop Solunke
3	10/07/2017	Fracture radial head a) classification b) Signs and symptoms c) treatment	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Swaroop Solunke
4	12/07/2017	Fractures of the tibial shaft and fibula a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Anteshwar Birajdar
5	17/07/2017	Dislocations elbow	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Anteshwar Birajdar
6	19/07/2017	Fractures of patella a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Ashwinkumar Khandge
7	24/07/2017	Supracondylar fractures of the humerus a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Ashwinkumar Khandge
8	26/07/2017	Fractures of the proximal tibia a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Sachin Sonawane

9	31/07/2017	Fractures of the clavicle a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Shashikant Jaykar
10	02/08/2017	Supracondylar fractures of femur a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Tushar Pisal
11	07/08/2017	Fractures proximal humerus and shaft a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Sachin Sonawane
12	09/08/2017	Fractures of the femoral shaft a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Vivek Patole
13	14/08/2017	Dislocation shoulder f) Classification g) Signs and symptoms investigation h) Closed treatment i) Operative treatment j) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Tushar Pisal
14	21/08/2017	Injuries of the acromioclavicular joint	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Vivek Patole
15	28/08/2017	Fractures talus and calcaneum a) Classification b) Signs and symptoms investigation c) Closed treatment d) Operative treatment e) Complication	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Satish Uchale
16	04/09/2017	Metatarsal and phalanx fractures	Aim is to achieve early diagnosis to institute early proper treatment & rehabilitation for full functionally recovery & early return to work	Dr. Vinod Nair
